Foreword	7
Preface	8
Acknowledgements	9
Executive Summary	11
Literature findings	12
Rationale for the study	12
Summary of participating students' achievement over the transition and beyond	13
Summary of participating students' attitudes over the transition and beyond	13
Views of students, teachers and parents in relation to students' experiences at school, their learning and their achievement	14
Further reports from the study	14
CHAPTER 1: Introduction	15
Background	16
Rationale for the research	16
How the study was conducted	17
Reporting the results from the Transition Study	20
Important points to keep in mind when reading this report	21
CHAPTER 2: Student Assessment Tool	23
Why we used asTTle	24
Ensuring consistency over time	24
The composition of the asTTle tests	24
Students' attitudes towards mathematics, reading and writing as measured by asTTle	30
Students' preparation for the asTTle tests	30
CHAPTER 3: Overall Trends In Students' Achievement over the Transition and Beyond	31
Overall trends in mathematics, reading and writing	32
Students' achieved curriculum levels	34
Comparison of students' achievement scores with the national asTTle dataset	37
Summary of overall trends in students' achievement	39
CHAPTER 4: Individual Students' Pathways of Achievement in Mathematics, Reading and Writing	41
Changes in individual students' achievement in mathematics	42
Changes in individual students' achievement in reading	44
Changes in individual students' achievement in writing	46
Summary of students' pathways of achievement in mathematics, reading and writing	47

CHAPTER 5: Analysing the Performance of Low, Middle and High Achieving Students	51
Tracking the mean achievement scores of students in the middle half and top and bottom quartiles	53
Students in the bottom quartile for mathematics	54
Students in the middle half for mathematics	55
Students in the top quartile for mathematics	56
Students in the bottom quartile for reading	57
Students in the middle half for reading	58
Students in the top quartile for reading	59
Students in the bottom quartile for writing	60
Students in the middle half for writing	61
Students in the top quartile for writing	62
Summary of the achievement of low, middle and high achieving students	63
CHAPTER 6: Students' Attitudes Towards School, Teachers and their Subjects over the Transition and Beyond	69
Students' attitudes towards mathematics, reading and writing from the asTTle assessments	71
Comparison of students' attitude scores with the national asTTle dataset	72
Students' attitudes towards school	73
Students' attitudes towards their teachers	75
Students' attitudes towards mathematics from their interview data	78
Students' attitudes towards reading and English from their interview data	79
Students' attitudes towards writing and English from their interview data	85
Summary of trends in students' attitudes over the transition and beyond	87
CHAPTER 7: The Influence of Parental, Caregiver and Family Support on Students' Achievement	89
Teachers' views on support provided for students	90
Students' views on the support they received	92
Parents' views on support provided for students	95
Summary of the support students received	97
CHAPTER 8: Views of Students, Teachers and Parents in Relation to Students' Experiences at School and their Learning and Achievement	99
Students' perceptions of school, learning and their achievement	100
Teachers' perceptions of students' learning and their achievement	106
Parents' perceptions of their child's learning and achievement	108
Analysing the different perspectives of teachers and parents	109
Summary of the perceptions of students, teachers and parents	116
CHAPTER 9: Concluding Comments	117
